

Increase alignment to enhance services and lower costs

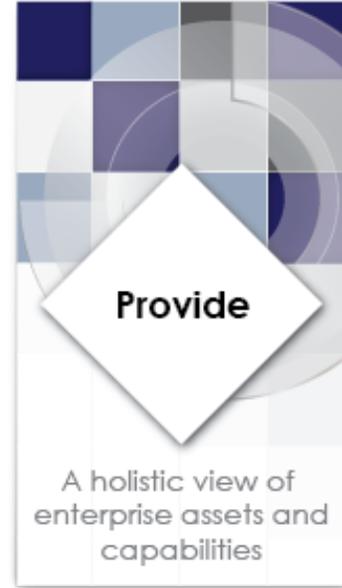

Identify Opportunities

A vertical card with a background of overlapping squares in shades of blue, grey, and white. At the top, the text 'Increase alignment to enhance services and lower costs' is centered. Below it, a white circle contains the bold text 'Identify Opportunities'.

Leverage
Existing and new Assets for Reuse

A vertical card with a background of overlapping squares in shades of blue, grey, and white. A white rectangular box in the center contains the bold text 'Leverage' and the text 'Existing and new Assets for Reuse' below it.

Provide
A holistic view of enterprise assets and capabilities

A vertical card with a background of overlapping squares in shades of blue, grey, and white. A white diamond shape in the center contains the bold text 'Provide' and the text 'A holistic view of enterprise assets and capabilities' below it.

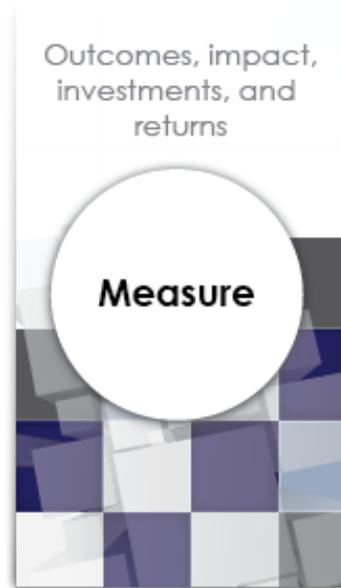

Traceability through strategy, projects, processes and practices

Enable

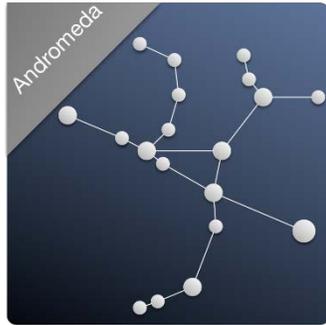

A vertical card with a background of overlapping squares in shades of blue, grey, and white. At the top, the text 'Traceability through strategy, projects, processes and practices' is centered. At the bottom, a white triangle points upwards, containing the bold text 'Enable'.

Outcomes, impact, investments, and returns

Measure

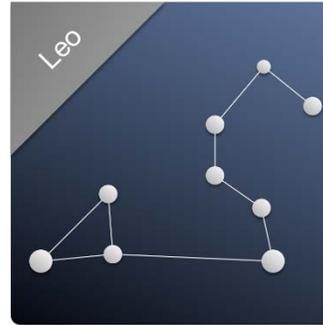

A vertical card with a background of overlapping squares in shades of blue, grey, and white. At the top, the text 'Outcomes, impact, investments, and returns' is centered. Below it, a white circle contains the bold text 'Measure'.

Initial Constellations

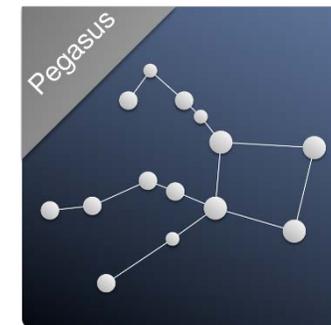

Andromeda Constellation: **Develop an interagency EA community (the who)**

- Provide **governance** and oversight while sustaining stewardship
- Build/institutionalize a **community** including best practices
- Establish **communication** and **transparency** including training and professional development tactics/resources

Leo Constellation: **Define and Develop enterprise level EA program (determine how to build the what, when, where, how, and why)**

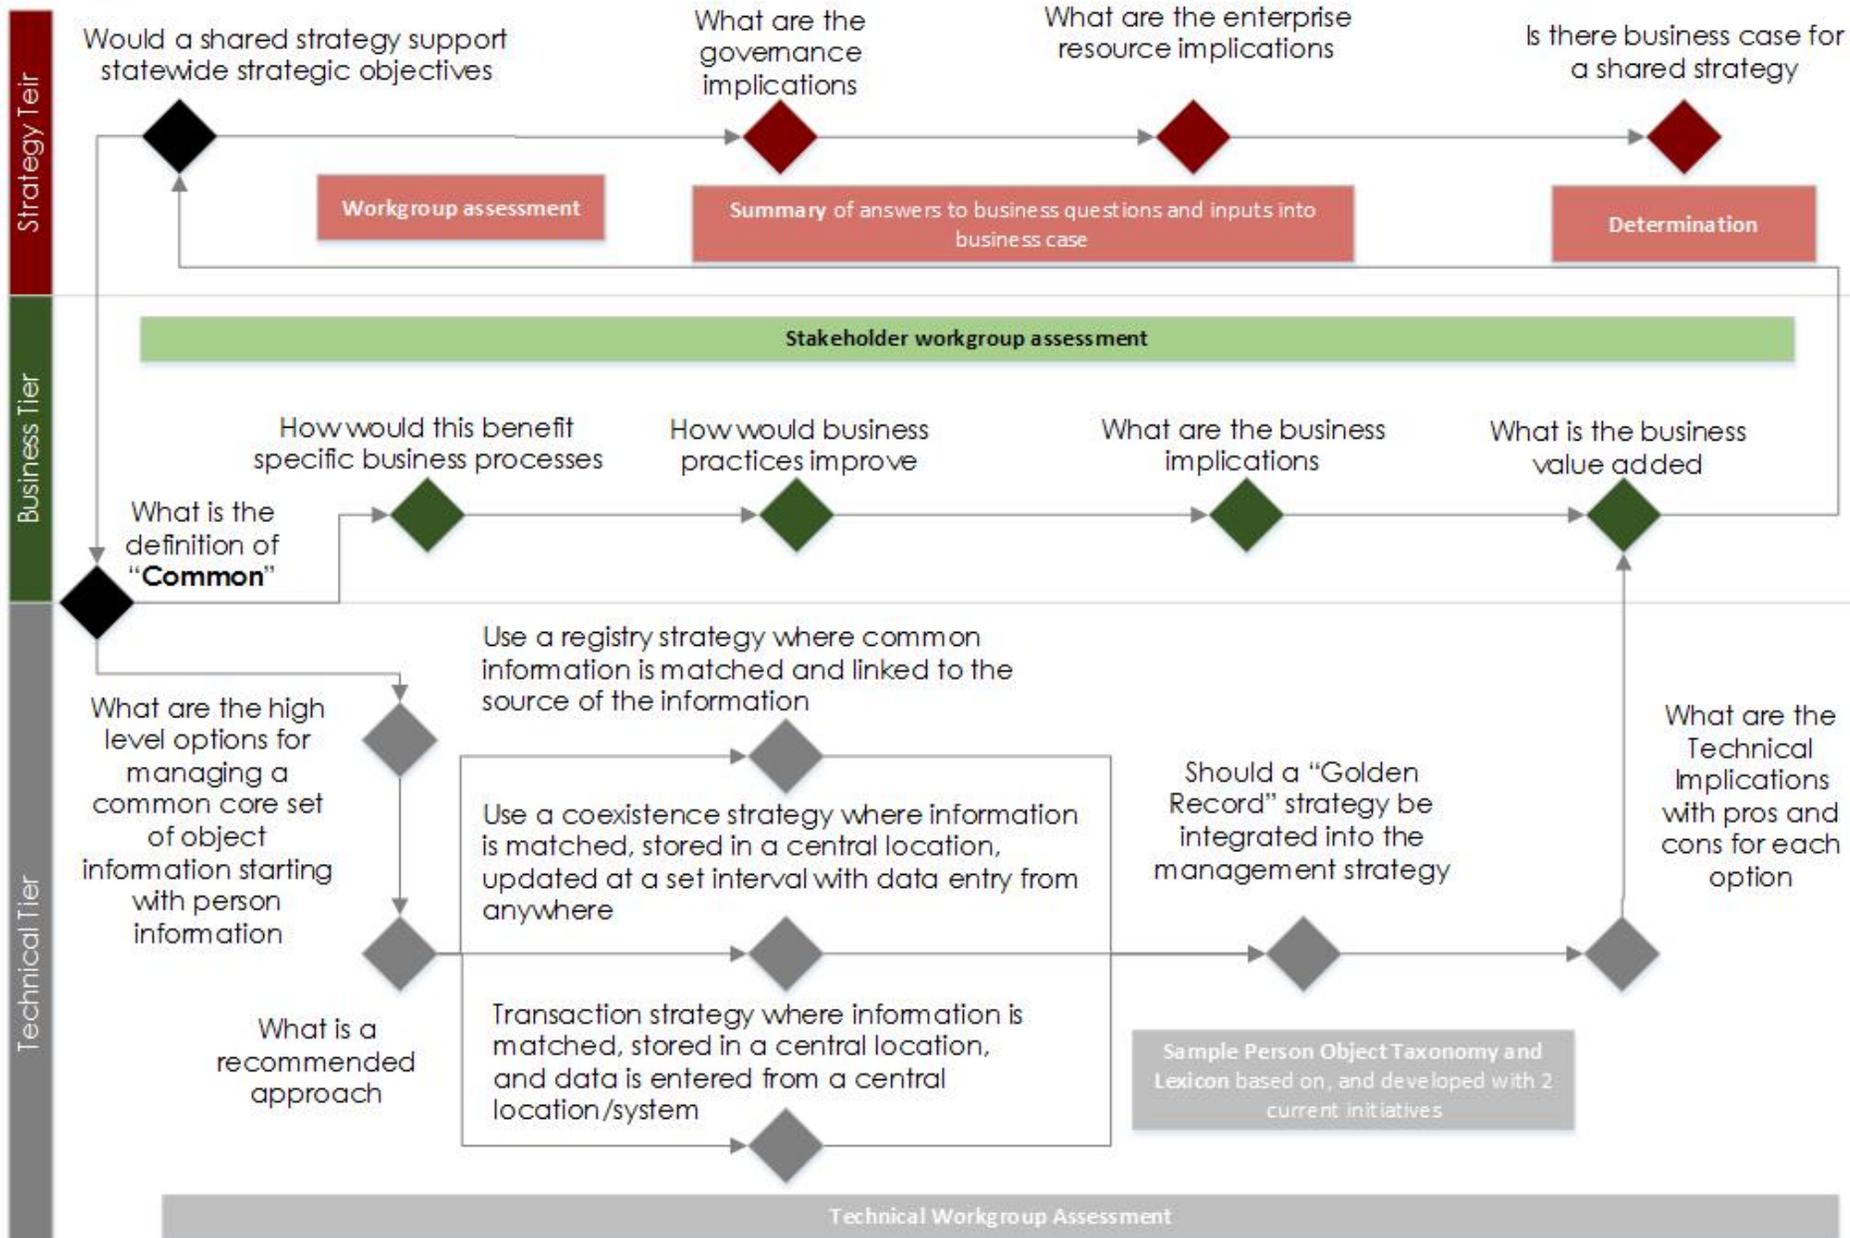

- Develop a **Statewide** EA Program
- **Continuously improve** EA program based on real implementation efforts, pilots, and emergent enterprise needs
- **Define boundaries** of enterprise level and agency level EA
- Identify a suite of **support functions and tools** that meet common and individual tools
- Identify **mode of EA** development within and between agencies

Pegasus Constellation: **Build enterprise level architecture and reference models**

- **Develop an EA** (do the work)
 - Pilot development processes and artifacts based on current programs, projects and initiatives based on 2-3 selected candidate projects
 - Provide proof of concepts
- **Provide** ongoing EA support
- **Document** boundaries

Overarching Question: Should the State have a shared strategy for managing a common core set of person information including identifiers:
 Question Tree

Expanded Technical Question: What are the options and what is the best technical strategy for common core sets of shared objects across agencies (people, locations, assets, etc.)
