

Governance

- **Modernizing** the model and approach for strategy, policy and standards development
- **Pursuing** enterprise service designations
- **Creating** a new constellation of areas for policy and standards development
- **Chartered** or chartering workgroups to address
 - **Core common person** information (starting in September)
 - **IPv6** (starting in November)
 - **APIs and API management** (starting in December)
 - **Identity management** (starting in November)

Build Architecture

Work in Progress

- Service provider payments
- Creating business process for identifying and designating enterprise service due to breadth (used across the state) or depth (guardrails if used)

Develop EA Program

- **Developing** an OCIO EA program plan and engaging groups such as the SEART and the Statewide EA group
- **Implementing** tools such as Sharp cloud to develop enterprise artifacts and EA effort roadmaps
