

Offer a secure environment for cloud services provided by Microsoft and other vendors.

### Identity & Access Management

- Single sign-on using Active Directory accounts eliminates need to manage multiple identities
- Self-service password and group management reduces support calls
- Automation of workflow and policies reduces administrative workload
- Supports multi-factor authentication for access to sensitive data

### ONE IDENTITY FOR ALL STATE BUSINESS

Foundation for a secure and manageable enterprise.

Agencies retain control & remain compliant.

### Office 365 Environment

- Single shared environment (tenant) facilitates collaboration between agencies
- Microsoft Government Cloud enables compliance with security standards
- Secure, dedicated high-capacity network connection provides consistent performance
- Allows agencies to move to cloud services at their own pace

### EASILY AND SECURELY COLLABORATE

Enables users to access services in the Microsoft cloud OR on premise providing greater flexibility for users.

### WaTech Services

- Perform discovery, information gathering and prepare environments for migration
- Migrate, synchronize and perform validation & testing
- Maintain, support and secure cloud services for the state

### FOCUS ON CORE MISSION, NOT IT INFRASTRUCTURE

Agencies can spend more time on value added initiatives.
