Section 701 legislative requirements reporting and Gate Certification request Online form is now live!

Audience

Project managers with projects subject to Section 701 of the enacted budget or funded through the IT revolving account. See the list of IT funding provided by enacted budget(s) file on WA State IT Dashboard for projects subject to section 701.

Background

Since July 2023, the WaTech Oversight team has been working with agency partners whose projects are subject to Section 701 to align on legislative requirements for some of the newer portions of Section 701.

What's changing?

A couple of things:

1. In lieu of the current Word form, you'll now use a simpler online form with drop-down options.
2. In lieu of gate certification requests by email, you'll now submit your gate certification requests in one simple form that combines gate certification + 701 requirements updates.

Where can I find the new form?

See Salesforce platform > Project Detail Page > Request Gate Certification button in top right.

Please note: project managers will submit the new form in Salesforce using their existing license.

When is this effective?

All Gate Certification requests as of June 7, 2024, and beyond will use this form.

Next steps

In the coming weeks, your assigned Oversight Consultant will meet with project managers to discuss responses and how the project can work to fully meet the legislative requirements, where applicable.

Questions?

Please reach out to your assigned Oversight Consultant (available on the WA State IT Dashboard).
