Technology Services Board Portfolio/Policy Subcommittee Meeting

April 8, 2021 9:00 a.m. – 11:00 a.m.

ΤΟΡΙϹ	LEAD	PURPOSE	TIME
Welcome and Introductions	Mark Quimby	Introductions	9:00
Approve Minutes from Feb. 11 Subcommittee Meeting	Mark Quimby	Approval	9:04
Standard 161.07: NG9-1-1 Geospatial Data Standard - Update	Sue Langen Joanne Markert	Review/Recommend for Approval	9:05
Enterprise Cloud Computing Program Status	Sue Langen Dan Mercer	Program Status	9:15
Public Comment			9:45

Current TSB Members

Industry Members Butch Leonardson – Retired CIO Paul Moulton – Costco	Legislative Members Rep. Matt Boehnke – House R Sen. Joe Nguyen – Senate D Sen. Ann Rivers – Senate R
Executive Branch (Agency Directors) Mark Quimby – Acting State CIO & Chair David Danner – UTC Tracy Guerin – DRS Vikki Smith – DOR	Other Government Viggo Forde – Snohomish County
Vacancies: Industry Representative House Democrat Labor Union Representative Members present Members absent	

Approve 02/11/2021 Minutes

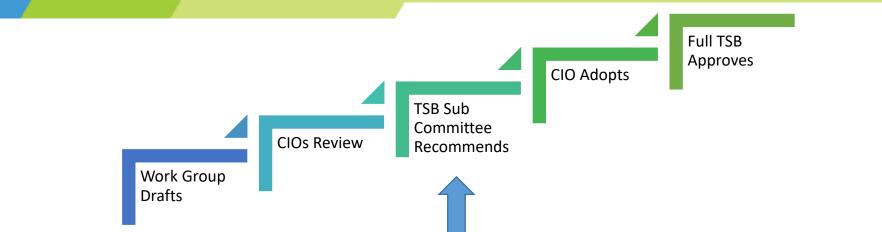

Standard 161.07 NG9-1-1 Geospatial Data Standard

Technology Services Board Portfolio/Policy Subcommittee Meeting

Where Are We?

- Review and update of an existing standard
- Request for update from State 911 Office @ WA Military Department
- Reviewed with state 911 GIS workgroup, includes local Public Safety Answering Points (PSAPs) representation
- Agency GIS managers through technical committees OCIO leads
- Geographic Information Technology Committee members (includes agency CIOs/ deputy CIOs)
- State agency CIOs
- Comments were reviewed and integrated into versions of the standards, to create the one offered today for approval

Standard 161.07 NG9-1-1 Geospatial Data Standard

Purpose of action

 Approve updates based on sunset review of standard

- Refined language and references in the standard to more current information
- <u>RCW 38.52</u>

Key objectives

- Realign Washington NG 911 standards with federal requirements
- Have users adopt the latest federal standards

Strategic alignment

 Supports efficient, effective and accountable government by maintaining consistent standards with federal requirements and across Washington state

Implementation

- Continue current process and workflows
- Reviewed with potentially impacted stakeholders, local Public Safety Answering Points (PSAPs) & State 911 Office

Success criteria

- Implementation of the most recent federal standards for NG911
- PSAP solutions and data are using the recent federal standards

• Recommend approval of updates to Standard 161.07: NG9-1-1 Geospatial Data Standard?

Enterprise Cloud Computing (ECC) Implementation Project

Technology Services Board Portfolio/Policy Subcommittee April 8, 2021

➢Quick Review of the State's Cloud Computing Strategy

- Origins the Statewide Cloud Readiness Assessment
- Components of the State's Cloud Computing Strategy

≻Learn the Strategic Role of the Enterprise Cloud Computing (ECC) Program

Examine the ECC Implementation Project

- Objectives
- Status and Next Steps

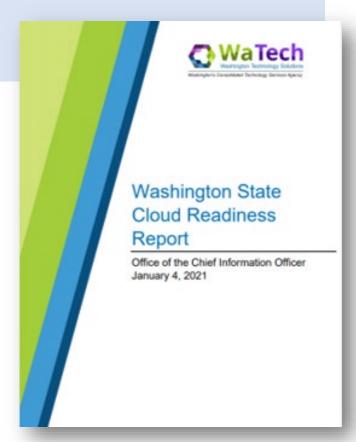

2019 Legislature directed the OCIO to conduct a statewide cloud readiness assessment to:

- Prepare for migration of core services to the cloud.
- Identify ways the state can reduce costs, with targets.
- Evaluate impacts to agencies and the state's IT workforce.

Unisys was contracted to conduct the study

- Unisys documented results and recommendations in a 377-page report.
- The Unisys recommendations are the basis for the OCIO's *Washington State Cloud Readiness Report* and associated cloud migration plan.
- Both documents are available on the OCIO's public website at: <u>https://ocio.wa.gov/reports</u>

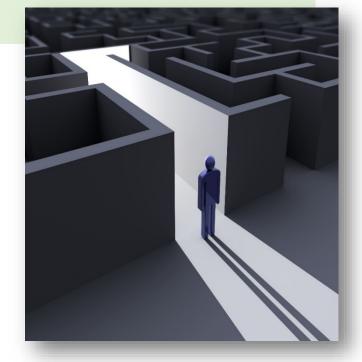

Key Assessment Findings and Recommendations

Key Findings:

- Most virtualized server-based applications are cloud ready but not necessarily cloud optimized.
- Moving existing applications to the cloud yields \$60M net benefit (47% ROI), assuming 9000 servers and 3300 applications are migrated to cloud services over 5 years, and no new hardware is purchased.
- Neither state agencies nor the IT workforce are ready for large-scale migrations.
- Cloud is not just about savings it is the foundation for innovation and transformation.

Key Recommendations: Take an Enterprise Approach!

- Formalize statewide cloud strategy and policies.
- Prepare agencies, workforce, applications, security, and network.
- Start by establishing a central Cloud Broker and Cloud Center of Excellence (CCoE) to facilitate efficient migrations, and enable secure and cost-effective long-term adoption, operations, and innovation.

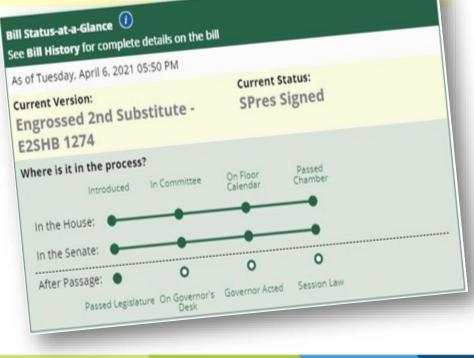

Engrossed 2nd Substitute HB 1274

- Section 1 (3) Therefore, the legislature *intends to migrate the state's information technology toward cloud services*, which will deliver the capacity, security, resiliency, disaster recovery capability, and data analytics necessary to allow the state to provide Washingtonians the services they require during this pandemic and in the future.
- State agencies are required to locate all existing and new information or telecommunications investments in the SDC or within third-party, commercial cloud computing services.
- *A task force on cloud transition* is established. The task force must review impacts on the workforce, retraining needs, and optimal methods to deliver such training and report its recommendations to the Governor and Legislature by November 30, 2021.

Recommended Strategy - Agencies *shall adopt cloud solutions* for new IT investments. Existing IT systems *shall be migrated* to cloud solutions unless doing so imposes an unmanageable risk or hardship.

Recommended Cloud Policies

- After June 30, 2022, all new IT initiatives must use approved cloud solutions – no new hardware purchases will be approved.
- By June 30, 2022, agencies will report a list of applications and target migration dates, and report progress annually.
- By June 30, 2026, all *cloud-ready* systems on-premises must be retired, and assets moved to cloud solutions.
- Those systems not cloud-ready must go to the SDC.

Prepare the Enterprise

1. Enterprise Cloud Computing (ECC) Program

- Cloud Services Brokerage Team
- Strategic Cloud Adoption Team (a.k.a. CCoE)
- Cloud management tools
- Cloud-ready operations
- 2. Cybersecurity
- 3. Network assessment
- 4. Identity management
- 5. Organizational change management
- 6. State IT workforce development

Migrate the Enterprise

Establis Phase 1 Initiate	sh Program Phase 2 Execute	Enterprise Cloud Com Strategic Cloud Adop (Facilitates efficient migrations, oversees preparation activitie	tion + Cloud Brokerage		
YOU ARE HERE	Migration contractor starts	 FY22 - FY27 Migration Projects Start with "low hanging fruit" 			
FY21	FY22	2 FY23 FY24	FY25	FY26 🚺 F	
	FY22 - FY24 • Workforce Planning • Organizational Change Management FY22 - FY24 • Cybersecurity • Cloud-ready Operations • Network Improvements • Cloud Management Tools • Identity Management		OPTIONAL: Portfolio Rationalization & Cloud Optimization		
			Policy Deadlines Stop purchasing server hardware Target for applications to be fully migrated to cloud services		

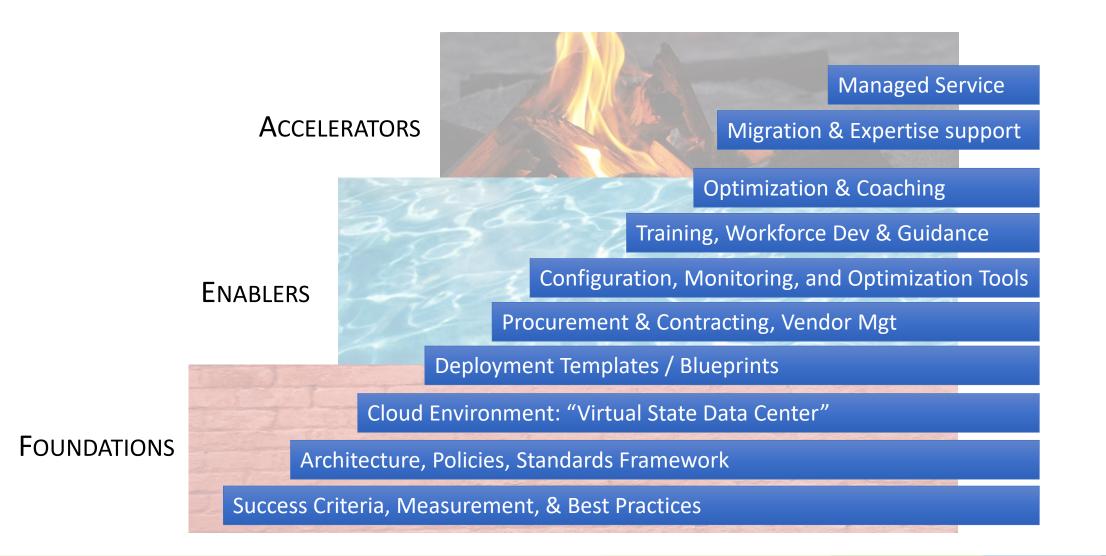

ECC Program – Enterprise Benefits

- Accelerated statewide cloud adoption and migration to seize opportunities for modernization and efficiency;
- Enhanced security and overall resilience through universal application of fundamental cloud architecture standards, i.e., "virtual state data center";
- Consistent best pricing and service levels for all agencies;
- Comprehensive accounting of state IT configurations;
- Transparent measures of cloud usage and costs; and
- Agencies, workforce, and infrastructure effectually prepared and equipped to leverage cloud innovations rather than relying on outdated patterns and skills that escalate cloud costs and risks.

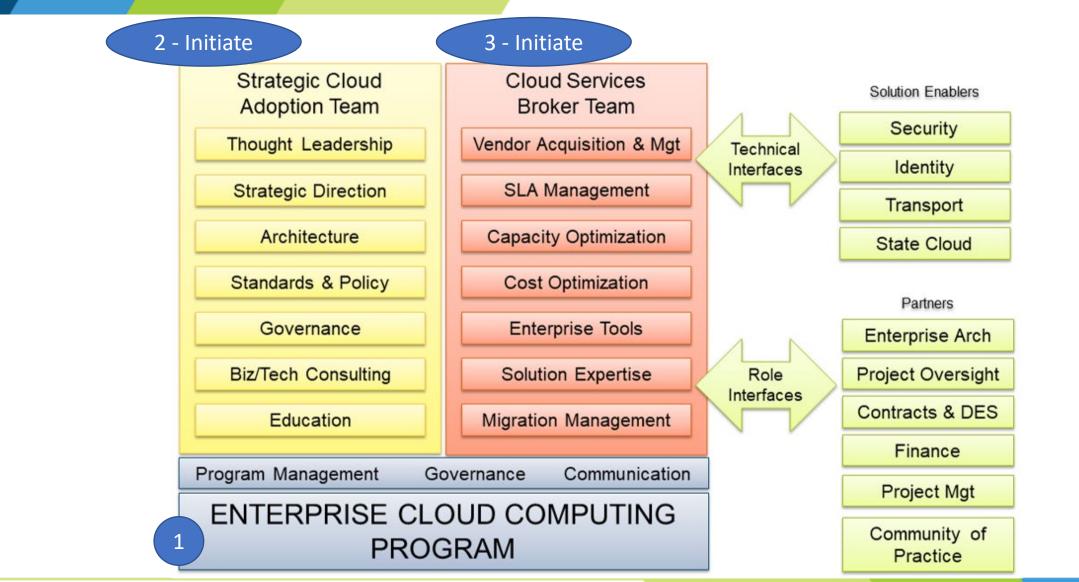

ECC Conceptual Model (draft)

ECC Phase 1 Work Streams

ECC Phase 1 Milestones / Key Deliverables

Milestone/Deliverable Description	Milestone/Deliverable	Planned Completion
ECC – Phase 1 Project Charter	Deliverable	3/12/2021
Project Management Plan	Deliverable	3/19/2021
Discovery Insights (working draft) from States, Vendors, and Agencies	Deliverable	4/5/2021
Enterprise Cloud Computing Program strategy, vision, objectives, and mission Value Prop (working draft)	Deliverable	4/16/2021
Program Staffing Plan (working draft)	Deliverable	4/16/2021
RFP for Implementation Support Services (working draft)	neliverable 🗸 🗸	4/30/2021
RFP for Implementation Support Services (posted)	Milestone	5/15/2021
RFP ASVs Announced	Milestone	7/15/2021
Final SVMO and roadmap for program and future workstreams	Deliverable	6/30/2021
Enterprise Cloud Computing Program Governance Model	Deliverable	6/30/2021
ECC Success Criteria (working draft)	Deliverable	6/30/2021
ECC Manager hired	Milestone	7/1/2021
WF-10 prep: Cloud Ready Operations architecture (working draft)	Deliverable	7/31/2021
EA-1 prep: Tool requirements (working draft)	Deliverable	7/31/2021
ECC – Phase 1 Completed	Milestone	7/31/2021

ECC Project Objectives and Next Steps

Phase 1 – Initiate (In Progress)

- □ Project governance establish steering committee
- Discovery gather input from states, vendors, agencies
- □ Program Development mission, functions, processes
- □ Staffing hire ECC manager, establish new staff positions
- □ Contractor(s) RFP for expert cloud migration vendor

Phase 2 – Execute (August 2021)

- Award contract, hire staff FTEs, and execute program plan
- Setup enterprise migration governance, begin planning with agencies and identify "low hanging fruit" to migrate first
- □ Initiate other preparatory projects, e.g., Identity Management
- □ Support workforce development and OCM

Conclusion

Moving to the cloud is clearly in the state's best interest.

A smart, strategic, enterprise approach

- Formalize statewide cloud strategy and policies.
- Prepare agencies, the workforce, applications, security, and network infrastructure.
- Start with a central Enterprise Cloud Computing program to enable preparation, accelerate migrations, and provide foundation to support ongoing cloud adoption and business innovation.

Enable – Accelerate - Support

Thank You
