

WaTech Innovation and Modernization Portfolio of Projects

Agencies and projects that have received funding:

- **Health Care Authority:** \$255,013 to deploy an electronic consent management solution that facilitates patient-authorized exchange of sensitive data and is scalable, secure, sustainable and meets provider needs.
- **Department of Ecology:** \$152,700 for a water resources online customer portal to authenticate users, view applications, review requirements for online application submission and submit applications online.
- **Secretary of State's Office:** \$150,000 to purchase a solution that replaces antiquated, legacy technology generating high volume of problem tickets and manual reconciliation work for the agency.
- **Eastern Washington State Historical Society:** \$108,000 to replace a collection management system with new software to support the museum's objects and archive/special collections. The project automates manual processes and expands access to its collection database.
- **Washington State Patrol:** \$250,000 to adopt ServiceNow and migrate legacy applications to the platform.
- **Department of Fish and Wildlife:** \$380,000 to deploy a digital workflow automation solution that will modernize outdated systems, eliminate manual paper processes and improve the efficiency and effectiveness of their permitting processes.
- **Office of Financial Management:** \$6,000 to Implement a candidate relationship management tool to integrate and supplement Washington's current Application Tracking System. This solution will contribute to the state's ability to better attract and source job seekers for IT-related positions.
- **Washington State Arts Commission:** \$80,670 to migrate the museum's collection database from an existing legacy solution with limited business capabilities to a modern solution that provides new functionality expected with a modern-day solution. This will allow the museum to improve citizen and staff access to museum collections with secure, mobile-ready features.
- **Department of Transportation:** \$25,000 to implement a solution to measure and optimize employee engagement experiences in a more holistic approach that allows real-time data into employee satisfaction, retention and the ability to serve Washington citizens. Leverage survey capabilities to engage employees more frequently and act on feedback more often.
