New Service Inquiry:
Key Management

May 16, 2016

What It Entails

- Key Management service primarily for Extensible Key Management (EKM)
- Complimentary to <u>Secure Certificates</u> Service, including Internal Certificate Authority
- Provides added security to protect private keys for encrypted databases from loss/theft
- Infrastructure fully managed by WaTech
- Part of the Security Gateway allocation

The Inquiry

1. Are you interested in Transparent Data Encryption (TDE) for encrypting data at rest?

2. If so, how many database servers (unique IPs) would leverage the service? A clustered instance counts as one; a separate production and test server would count as two.

3. What database platform(s) and version(s) do you use?

Who to Contact

- CC Kermen, Secure Gateway Services Manager, chawntain.kermen@watech.wa.gov
- Carmen Cody, Secure Gateway Services Supervisor, carmen.cody@watech.wa.gov
- One of our **FANTASTIC** customer account managers:
