RCW [39.24.240](#) Data Sharing - Agencies

1. Agencies must classify [data](#) into categories based on its [sensitivity](#) and handling requirements.

a. Agency data classifications must translate to or include the following classification categories:

i. [Category 1 - Public Information](#)

Public information is information that can be or currently is released to the public. It does not need protection from unauthorized disclosure but does need [integrity](#) and [availability](#) protection [controls](#).

ii. [Category 2 - Sensitive Information](#)

Sensitive information is not specifically protected from disclosure by law but is for official use only. Sensitive information is generally not released to the public unless specifically requested.

iii. [Category 3 - Confidential Information](#)

Confidential information is information that is specifically protected from either release or disclosure by law. This includes, but is not limited to:

- A. Personal information as defined in [RCW 42.56.590](#) and [RCW 19.255.010](#).
- B. Information about public employees as defined in [RCW 42.56.250](#).
- C. Lists of individuals for commercial purposes as defined in [RCW 42.56.070\(8\)](#)
- D. Information about the infrastructure and security of computer and telecommunication networks as defined in [RCW 42.56.420](#).

iv. [Category 4 - Confidential Information Requiring Special Handling](#)

Confidential information requiring special handling is information that is specifically protected from disclosure by law and for which:

- A. Especially strict handling requirements are dictated, such as by statutes, regulations, agreements, or other external compliance mandates.

B. Serious consequences could arise from unauthorized disclosure, such as threats to health and safety, or legal sanctions.

b. Refer to the [Risk Management Policy](#) and [Risk Assessment Standard](#) for management of risk based on these classifications.

2. Agencies must consider certain factors when categorizing data.

- a. Agencies must identify and understand all laws, regulations, policies, and standards that apply to their data and ensure applicable requirements are met.
- b. Agencies must take their missions and business objectives into consideration when evaluating their data classifications.
- c. Agencies must consider how combining or aggregating data may change the [sensitivity](#) of the data.
- d. In general, the sensitivity of a given data element is likely to be greater in combination than in isolation (e.g., association of an account number with the identity of an individual and or institution).
- e. When data is newly combined or aggregated its classification level should be reviewed.
- f. Agency Data Sharing: Refer to the [Data Sharing Policy](#).
