

# GeoDuck Solutions Report

## Alice Adams (Executive Assistant)

**Backstory:** Alice has been working as the Executive Assistant for the CFO, Evan Ericson, for over two years. Known for her punctuality, discretion, and organizational skills, she is well-liked by her colleagues. Her role gives her access to many high-level executives. Recently, she's been taking on extra projects and staying late, trying to prove herself indispensable to the company.

**Alibi:** Alice claims she was working late on several projects during the time of the data theft and denies having any involvement. She says that she was in the Finance Department at the time of the security breach and has no technical knowledge to perform such a theft. According to her, she was preparing for a company event, helping to organize materials for an upcoming meeting.

## Robert Reynolds (Marketing Manager)

**Backstory:** Robert is the charismatic and ambitious Marketing Manager who often travels for work, building relationships with external partners and clients. Recently, he was leading a major project to launch a new marketing strategy for the company's latest product.

**Alibi:** Robert claims he has a rock-solid alibi. He was out of the country during the time of the theft, while Robert is often involved in competitive dealings, he had no motive to sabotage the company, especially since the stolen data had nothing to do with marketing.

## Charlie Clemons (Financial Analyst)

**Backstory:** Charlie is a numbers guy through and through. As a Financial Analyst, he spends his days deep in spreadsheets, ensuring that the company's financial reports are accurate and up to date. Charlie is known for being meticulous and a bit of a perfectionist, often staying late to finish reports or check on data accuracy. While quiet and reserved, Charlie's colleagues know him as trustworthy and dependable.

**Alibi:** During the time of the data theft, Charlie was working late in his office, but he claims his focus was entirely on a complex financial report that had to be submitted the next day. He further claims he had no access to the data that was stolen, nor any knowledge of how to perform a digital theft. He was deeply immersed in his work and didn't notice any unusual activity.

## Diana Davis (IT Specialist)

**Backstory:** Diana is the IT specialist responsible for maintaining the company's network infrastructure and security protocols. She's highly knowledgeable about digital systems and often acts as the "go-to" person for solving technical issues within the company.

**Alibi:** Diana claims she was off-site working on an IT project during the time of the data theft. She was troubleshooting network issues at a different office location. While she could have had the technical skills to commit the theft, Diana insists she had no access to the CFO's office or any motive to steal sensitive financial data.

## Evan Ericson (CFO)

**Backstory:** As the CFO, Evan Ericson oversees all the company's financial operations. He has access to the company's most sensitive financial data and is trusted by the board of directors manage the company's fiscal health. Known for his strict policies and high expectations, Evan is a hard but fair boss. Due to his high-level access. His behavior has remained professional throughout the investigation.

to

**Alibi:** Evan claims that he was at home during the time of the data theft, and that he's baffled by the theft and frustrated by the breach of security in his department. He further claims he had no reason to steal data from his own department, especially when he was already working on improving the company's profitability.
