

# ECCP Update

**Date: February 2025**

- We're excited to announce new upgrades to the Enterprise Cloud Computing Program (ECCP) Learning Platform, hosted by Pluralsight. Pluralsight is an industry-leading learning platform offering thousands of courses on a wide range of topics, not just cloud computing. So far, we're onboarding 43 agencies, with approximately 2,900 state IT professionals already enrolled.
- New features include a personalized home page that tracks your progress and training goals, curated learning paths designed for 12 different cloud roles across beginner, intermediate, and advanced skill levels, and a new AI assistant to help users find courses, get technical explanations, and build customized learning plans. Looking ahead, we're working on integrating Pluralsight with the state's Learning Management System (LMS) to provide a unified training transcript, consolidating all completed courses in one place. Stay tuned for updates on this integration! If you have questions or would like to onboard your agency's IT staff, please contact Chris Lamb ([chris.lamb@watech.wa.gov](mailto:chris.lamb@watech.wa.gov)).
