Namespace Registration & User Synchronization

1 Jennifer, a user in an agency that has migrated to O365 cloud exchange, wants to send an email to Rose at DRS.

Shared Enterprise Tenant
Azure Active Directory (AAD)

Current: 10,000 users

+11 secondary namespaces

Current: 60,000 users

Hybrid Connectors

2 The AAD is the directory source for Jennifer. To process the email, the AAD has two critical questions:

1. Can I find drs.wa.gov?
→ Namespace registration in AAD
2. Do I know Rose? Is Rose in the Global Address List for Jennifer?
→ User synchronized via Organizational Unit setting in EAD
