

## WS1 How to change device friendly name

The device friendly name that is displayed on Device List view in the WS1 console can be easily configured to use a variety of different attributes that will make that list view more user-friendly for agency staff that access the WS1 admin console. The following steps detail how agency MDM administrators can change the device list view.

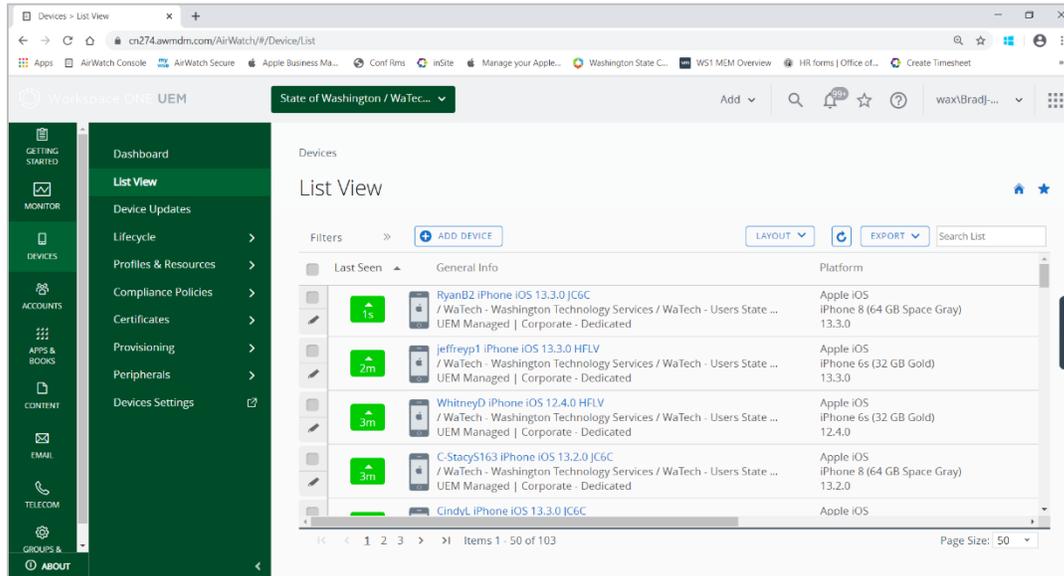

If you have questions or need assistance with implementation, please open a ticket with the WaTech Support Center [support@watech.wa.gov](mailto:support@watech.wa.gov) and ask that the ticket be routed to the WaTech MDM group.

1. Groups & Settings>All Settings>Devices & Users>General>Friendly Name, below are the default settings for Friendly Name; agencies can override this setting and select the attributes the agency's MDM administrator[s] wish to see from the WS1 admin console.
2. Note: On DEP devices with iOS 8 or above agencies can choose to the 'device name' on the device to the Friendly Name.

3. Default attributes:

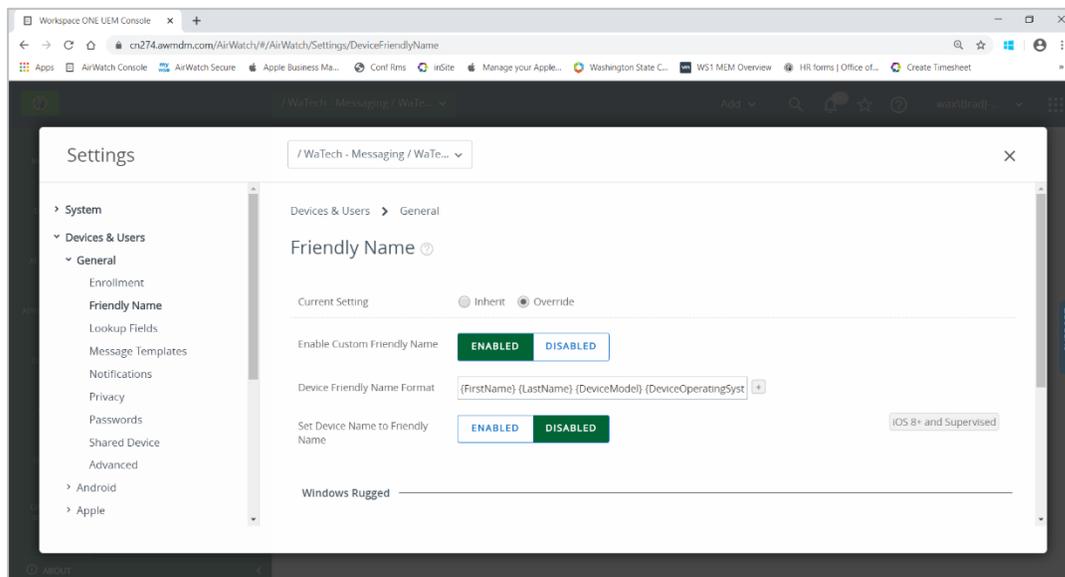

{EnrollmentUser} {DeviceModel} {DeviceOperatingSystem}  
 {DeviceSerialNumberLastFour}

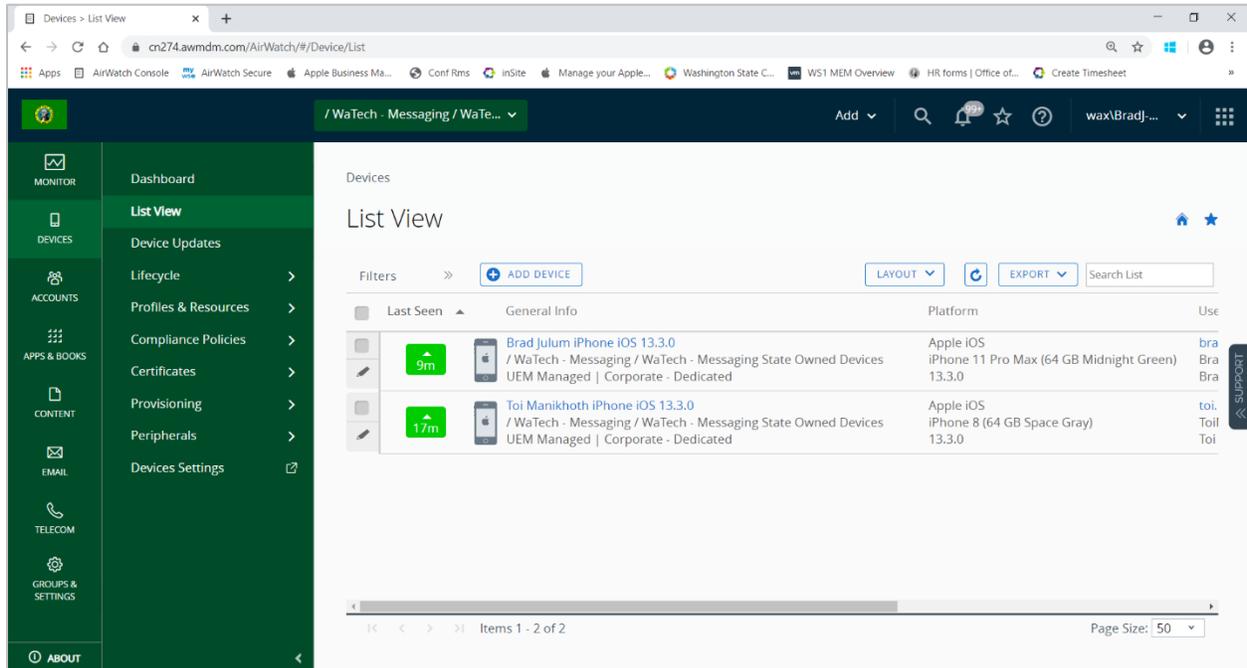

4. Select Override, Device Friendly Name Format:

{FirstName} {LastName} {DeviceModel} {DeviceOperatingSystem}

5. Save

## New device list format

The screenshot shows the 'List View' of devices in the AirWatch console. The interface includes a left-hand navigation menu with categories like MONITOR, DEVICES, ACCOUNTS, APPS & BOOKS, CONTENT, EMAIL, TELECOM, and GROUPS & SETTINGS. The main content area displays a table of devices with columns for 'Last Seen', 'General Info', 'Platform', and 'Use'.

Last Seen	General Info	Platform	Use
9m	Brad Julum iPhone iOS 13.3.0 / WaTech - Messaging / WaTech - Messaging State Owned Devices UEM Managed   Corporate - Dedicated	Apple iOS iPhone 11 Pro Max (64 GB Midnight Green) 13.3.0	bra Bra Bra
17m	Toi Manikhoth iPhone iOS 13.3.0 / WaTech - Messaging / WaTech - Messaging State Owned Devices UEM Managed   Corporate - Dedicated	Apple iOS iPhone 8 (64 GB Space Gray) 13.3.0	toi Toil Toi

At the bottom of the list view, there is a pagination bar showing 'Items 1 - 2 of 2' and a 'Page Size: 50' dropdown menu.

**Attributes to select from:**

<b>NAME</b>	<b>DESCRIPTION</b>
